

Outdoor Visitation is Still Prohibited at Nursing Facilities

On June 25, 2020, LNHA requested that the Louisiana Department of Health (LDH) Office of Public Health (OPH) consider if nursing facilities could offer residents and their family members socially distanced outdoor visits by appointment. The leadership at LDH OPH responded to the request noting that due to the significant increase in COVID-19 cases across the state, they will not allow a change to visitor restrictions at this time.

LNHA will revisit the request at a later date as we know the importance of visitation for our residents and their loved ones.
